PRODUCT CATALOG

OptiMo® Fiber Optic Solutions

Ideal for data center/SAN or enterprise LAN applications, OptiMo fiber optic solutions support common, convenient approaches to fiber optic cabling. Momentum® series modular optical cassettes provide a system that is simple to design, quick to install, highly reliable and error-proof. For a conventional field-installation as well as factory-terminated pigtailed for a splicing approach, we offer no-epoxy/no-polish and quick-cure anaerobic field-installable connectors. Also, for Secure Keyed LC fiber products, contact Ortronics®. For all your installations, OptiMo fiber solutions guarantee quality and performance.

OPTIMO® FIBER OPTIC SOLUTIONS

Ortronics® offers innovative fiber optic solutions to meet all your needs with greater density, simpler installation, easier administration and higher performance.

The Ortronics range of rack mount fiber enclosures offers a comprehensive selection of products ideally suited to both large and small fiber installations. All fiber cabinets and related hardware are compatible with Mighty Mo® advanced cable management systems, so one system meets all cabling needs.

Choose the appropriate pre-terminated cassettes and adapter panels required for either the High Density system or for the standard density solution from the table below.

Rack Mount Fiber Cabinets High Density

NEW

In today's data centers and SAN environments, space is often at a premium, making density more critical than ever. OptiMo® High Density (HD) solutions offer the same advanced performance and reliability that you've come to expect from Ortronics® standard density OptiMo products in a footprint designed for space-constrained installations. Using a comprehensive OptiMo HD solution of high density rack-mount fiber cabinets with either adapter panels or pre-terminated cassettes provides a complete fiber cross connect patching solution for applications where maximum density is required.

OptiMo HD FC Series Rack-Mount Fiber Cabinets

OptiMo high density rack-mount fiber enclosures come complete with internal fiber management hardware and bend limiting clips for superior fiber management. These enclosures are compatible with all Ortronics Mighty Mo® equipment racks and cabinets. They are only able to accept M4 cassettes and HDFP adapter panels. They are optimally designed for 48 fiber splice trays.

Rack Mount Fiber Cabinets 625 Series Pre-Loaded

The Ortronics® range of pre-loaded rack mount fiber enclosures (625 Series) provides a comprehensive range ideally suited to both large and small installations. These enclosures are offered in 1U and 2U as a standard product. 625 Series fiber cabinet products are available with LC and SC adapters for single-mode or multimode applications.

- Pre-loaded with fiber adapters for simple, quick installations
- Slide-out drawer provides easy access for quick, reliable fiber termination and fiber management
- Bend limiters included to support minimum bend radius requirements ensuring low loss transmission*
- Universal mounting (19" or 23") for most rack types with standard EIA hole pattern
- Internal fiber management ring to provide proper bend radius and slack storage of excess fiber
- Termination access from front, top, and rear for internal fiber termination and management

*2U pre-loaded cabinets only.

ENCLOSURES

OptiMo® Raised Floor Fiber Patch Panels

Ortronics® OptiMo raised floor patch panel allows data center managers and designers to take advantage of under-utilized installation space beneath the raised floor structure, providing greater flexibility in structured cabling design and maximizing usage of premium data center floor space.

Specifically designed to be installed in raised floor enclosures that are part of the cabling pathways, the OptiMo raised floor fiber patch panels address the special bend radius and depth requirements of fiber optic cabling systems.

Features

- Fiber patch panel for underfloor installation
- 19" wide, 1 unit or 2 unit high models available
- Designed for installation within 2' x 2' underfloor box with angled mounting rails
- Removable/reusable labeling cards

Benefits

- Allows data center manager to take advantage of under-utilized space beneath raised floor
- Provides the flexibility to suit any installation
- Horizontal patch panel orientation
- Convenient and accurate cabling administration and record keeping that is easily removed to provide rear patching access

ENCLOSURES

Surface Mount Cabinets

Ortronics® 615 Series surface mount fiber cabinets secure, protect, and organize up to 384 single-mode or multimode optical terminations.

- Standard OFP Series adapter panels snap in for easy installation, removal, and expansion
- Surface/wall mountable is ideal for space limited installations
- Top/bottom cable entry simplifies installations, moves, adds, and changes
- Internal cable management included—facilitates organization and clean installations
- Open designs with available latch are economical and easily accessible

NOTE: Contact Ortronics sales for cassette compatibility.

CASSETTES

Ideal for data centers and SANs, the Momentum® series is a modular, pre-terminated cabling system that integrates optical cassettes with advanced fiber cable in the backbone. It's simple to use, fast to install, and the connectors are factory terminated and tested. The cassettes are supported by a range of rack-mount and underfloor patch panels for convenient installation.

It's the System That Counts

The performance of a fiber optic cabling system needs to be viewed from a system standpoint and not just as an assembly of individual components.

The optical loss performance of a modular cassette-based MTP*/MPO link is primarily affected by connector end-face polishing and connector end preparation at the factory. Therefore, it is essential that the MTP/MPO backbone cables and patch cords are pre-pared with a high-quality process that complements the cassette manufacturing process, otherwise, the expected end-to-end link insertion loss performance will not be realized.

* MTP is a registered trademark of US Conec.

- Simply put, to achieve improved
- performance you need high or
- premium cassettes with matching
- backbone and patch cables.

Momentum® 4 Modular Pre-Terminated Systems

NEW

OR-M4LCQ24-50EA3A1

OR-M4LCQ24-09

OR-M4LCQ24-62

Momentum 4 Cassettes

Momentum 4 modular fiber optic pre-terminated cassettes combine the plug-and-play functionality of our standard cassette with the high density footprint accommodating 96 fibers in one rack unit.

The Momentum 4 High Density Cassette fully supports the latest networking standards through 10 Gb/s and beyond. It is available in three performance levels for Laser Optimized Multimode 50 micron fiber. Each cassette has a data label with insertion loss value for each port.

- Premium Performance cassette/
mated pair insertion loss: 0.50dB
- High Performance cassettes/
mated pair insertion loss: 0.75dB
- Standard Performance cassette/
mated pair insertion loss: 1.25dB
- 1.05dB total insertion loss for
single-mode system
- Insertion loss value for each port
printed on adhesive data label

PART NO.	DESCRIPTION
OR-M4LCQ24-50EA3A1	LC Quad, 24 fiber, 50-micron LOMF*, 2 MTP**(M), premium performance, single unit
OR-M4LCQ24-50E	LC Quad, 24 fiber, 50-micron LOMF*, 2 MTP(M), high performance, single unit
OR-M4LCQ24-09	LC Quad, 24 fiber, single-mode, 2 MTP(M), high performance, single unit
OR-M4LCQ24-62	LC Quad, 24 fiber, 62.5-micron multimode, 2 MTP(M), high performance, single unit

* Effective modal bandwidth 4900 MHz-km @ 850nm.

*Effective Modal Bandwidth: 4900 MHz-km @ 850nm.

NOTE: Other cassette fiber types are available. Contact Ortronics sales.

ADAPTER PANELS

The Ortronics® OptiMo® OFP and HDFP series adapter panels are used with our popular FC Series modular fiber cabinets, offering great flexibility in structured cabling design. Front-removable adapter panels are available with LC, SC, ST, and MT-RJ adapters and feature options ideal for both single-mode and multimode applications. They are held securely in place with plunger/grommet fasteners.

Where applicable, the adapters used (LC, SC, and ST) contain application specific alignment sleeves to ensure optimal performance in conjunction with the economic constraints of network design.

For common multimode applications, phosphor-bronze (metal) alignment sleeves are used. With the increasing demands of high bandwidth multimode systems, like those containing laser-optimized multimode fiber, ceramic alignment sleeves are recommended. Finally, to ensure dependable transmission, ceramic sleeves are always used in single-mode applications.

PATCH CORDS

SpaceSaver Fiber Optic Cable Assemblies

Ideal for Data Center Applications

The SpaceSaver line of duplex fiber optic patch cords features a single 2.4 mm round jacketed cable. These patch cords are available with duplex LC connectors at each end in either A-B or A-A types per the TIA 568 standard. These patch cords are ideal for high density installations common in data centers and SANs optimizing the available vertical and horizontal cable routing spaces.

NOTE: For other lengths and configurations, consult the Ortronics sales department.

Momentum Backbone cables can also be ordered in 62.5/125 and standard 50/125 optical fiber for legacy and low data rate applications. Please contact your Ortronics sales representative for assistance.

Harness

Ortronics® harnesses are used to break out the MPO-fitted trunk cable into LC duplex connectors to plug directly into the active device. Each harness has a 12-fiber MTP*/MPO pinned (male) connector on one end and 6 duplex LC furcation tubes on the other. Each leg of the LC end can be either identical in length, or each leg can be staggered 30mm (1.18") longer than the tube before it; another way to minimize and manage excess cable slack.

*MTP is a registered trademark of UC Conec.

PART NO.	DESCRIPTION	↓

FIELD-INSTALLABLE CONNECTORS

The most critical point in any optical interconnect is the physical contact interface between mated connector pairs. When polishing fiber connectors, a small lens is created at the tip of the connector and the shape of this lens critically impacts transmission of light. Utilizing advanced laser interferometry equipment to monitor the manufacturing process, Ortronics® OptiMo® pre-polished field termination connectors exhibit highly controlled end-face geometry resulting in reliable, low insertion loss, minimal return loss connections. In addition, this approach eliminates imprecise epoxy application, time consuming curing, and highly variable hand polishing from field installation practices. The net effect is reduced installation expense, higher yield field terminations, and better performance.

Features

- No epoxy, polishing, or fusion splicing required
- No special tools required
- Fast installation
- Factory prepared and verified end face
- 62.5, 50 micron LOMF and single-mode versions available*
- Unlimited shelf life

Benefits

- Fast, easy assembly in the field
- Common fiber tools, readily available
- Cost savings
- Reliability and superior performance
- Flexibility for many installation applications
- Ready when needed, reduced waste

*All 50/125 field-installable connectors are suitable for use with 10 Gigabit (10GBASE-SR applications and 10GFC) systems.

FIELD-INSTALLABLE CONNECTORS

OptiMo® Pre-Polished Connectors

OR-205KAS9GA-50T

LC Field-Installable, 50/125, 900 Micron Buffer

OptiMo 10Gb/s field-installable LC connector for use with 50 micron multimode fiber is suitable for 10 Gigabit applications. The OptiMo 10Gb/s technology incorporates a factory-bonded fiber stub, ceramic ferrule, and precise factory polish. Designed for installation on 900 micron buffered fiber. Optional kits available for installation on 2.0 mm diameter jacketed cables (see OR-20500267).

PART NO.	DESCRIPTION
OR-205KAS9GA-50T	Individually packaged

NOTE: All 50/125 field-installable connectors are suitable for use with 10 Gigabit (10GBASE-SR applications and 10GFC) systems.

OR-205KAS9GA-09

LC Field-Installable, Single-mode, 900 Micron Buffer

OptiMo field-installable LC connector for use with single-mode fiber incorporates a factory-bonded fiber stub, ceramic ferrule, and precise factory polish. Designed for installation on 900 micron buffered fiber. Optional kits available for installation on 2.0 mm diameter jacketed cables (see OR-20500267).

PART NO.	DESCRIPTION

ST Accessory Kit for 2.4 and 3.0 mm Jacketed Fiber

Ortronics accessory kit for use in installing ST connectors on 2.4 to 3.0 mm jacketed cables. Kit includes strain relief connector boot using flexible engineering rubber, a 2.4 mm crimp ring, and a 3.0 mm crimp ring.

PART NO.	DESCRIPTION	↓
OR-20500236	Optional strain relief boot accessory kit for use in installing ST connectors on 2.4 and 3.0 mm jacketed cables. Package of 25	

FIELD-INSTALLABLE CONNECTORS

OptiMo® Pre-Polished Connectors Tools & Kits

With any tool kits, components get lost or worn out over time. To accommodate replenishment needs, Ortronics® offers a complete range of high quality accessory components supporting the OptiMo® field termination system. From cleaning supplies to cleavers, microscopes, instruction sheets, fiber strip and crimp tools, Ortronics has the components to meet a range of needs and keep installations moving forward.

OR-854B00000-1

Complete OptiMo Termination Kit

Ortronics complete OptiMo Termination Kit for installing ST, SC and LC type connectors. Kit includes universal installation tool, fiber cleaver, crimping tool, instruction manual, fiber preparation guide, microscope, alcohol wipes, felt tipped marker, scissors, tweezers, waste container and one fiber/cable stripper.

FIELD-INSTALLABLE CONNECTORS

OptiMo® Field-Installable Anaerobic Connectors

<p>OptiMo quick-cure, anaerobic epoxy field-installable connectors speed installation time. Strip the fiber, inject the adhesive into the connector, insert and scribe the fiber, then polish the connector end face to perfection for a high performance termination. Users and installers will benefit from high productivity and low connector costs — which translates directly into savings.</p>	Features	Benefits
	■ Simple design	■ Allows for lower unit costs. Advanced engineering helps us ensure long life and saves replacement costs.
	■ No capital equipment	■ With OptiMo field polish connectors, there is no need for curing ovens, UV light sources, or expensive polishing machines. It is possible to terminate anywhere without worrying about power sources or charging batteries.
	■ Fast application	■ Terminate fibers in about two minutes following the easy installation instructions, saving on installation time.
	■ Precision ceramic ferrule	■ Provides durability, temperature stability and scratch resistance.
	■ Single-mode or multimode	■ Simplistic offering reduces confusion by offering one style connector that covers all multimode applications to include 62.5µm, standard 50µm, or laser optimized 50µm for 10 Gigabit transmission, and single-mode.
	■ Pre-radius LC	■ One-piece pre-radius LC connector for minimal polishing and consistent end-face geometry resulting in more consistent optical performance.
	■ Reliable performance	■ Secure the installation of fiber using an adhesive and primer for a secure worry-free termination.
	■ Minimal tools	■ A compact and economical tool kit contains all the common tools necessary to complete the termination.

WORKSTATION SYSTEMS

Fib-or-Cop II

Fib-or-Cop II provides greater multimedia capacity, addressing the increasing need for fiber in horizontal cabling systems. This larger version of the Fib-or-Cop has the ability to mount six TracJack® modules in the face, with a choice of fiber (LC, SC, ST or MT-RJ) and/or copper (TracJack) exiting from the bottom. This design allows the cover to be removed without disrupting the connections in the face-plate. The wide variety of connectors located in the bottom positions can be further protected by an optional snap-on shroud.

In addition, the Ortronics line of workstation solutions offers many alternative designs to accommodate multimedia needs for in-wall and surface mount installations.

WORKSTATION SYSTEMS

TracJack® Modules & Faceplates

TracJack Modules

TracJack is a versatile single-module solution—the perfect combination of high quality, enhanced performance, labor savings, ease of use, and flexibility in design. TracJack front removable snap-in modules make moves, adds, and changes easy. TracJack products are compatible with Fib-or-Cop II and the complete line of TracJack faceplates and surface mount boxes. TracJack modules are available in LC, SC, ST, FC, and MT-RJ styles in order to suit any installation requirement.

Features	Benefits
■ Snap-in module	■ Simple, secure installation
■ Modular design	■ Flexibility in structured cabling system design
■ Front removable	■ Facilitates quick moves, adds, and changes
■ No special tools required	■ Reduced installation expense
■ Fully compatible with all TracJack faceplates	■ Provides wide range of design possibilities

TracJack Modules

PART NO.	DESCRIPTION
OR-63700039*	1-LC (2 fibers) multimode, beige adapter, phosphor-bronze alignment sleeves, 180° exit, flush, 1 unit
OR-63700050	1-LC (2 fibers) multimode, beige adapter, phosphor-bronze alignment sleeves, 45° angled exit, 2 units
OR-63700075*	1-LC (2 fibers) multimode, aqua adapter, ceramic alignment sleeves, 180° exit, flush, 1 unit
OR-63700017*	1-SC simplex multimode, beige adapter, phosphor-bronze alignment sleeves, 180° exit, flush, 1 unit
OR-63700066*	2-SC simplex multimode, beige adapters, phosphor-bronze alignment sleeves, 180° exit, 1 unit
OR-63700051	1-SC simplex multimode, beige adapter, phosphor-bronze alignment sleeves, 45° angled exit, flush, 2 units
OR-63700078*	1-SC simplex multimode, aqua adapter, ceramic alignment sleeve, 180° exit, flush, 1 unit
OR-63700011	1-ST simplex multimode, metal adapter, phosphor-bronze alignment sleeves, 180° exit, 1 unit
OR-63700013	2-ST multimode, metal adapter, phosphor-bronze alignment sleeves, 180° exit, 1 unit
